SUMMARY: Kyrsten is a Sr. UX Manager with dual degrees in Computer Science and Psychology and 10+ years of leading and supporting UX design and research efforts as a “player-coach”. Her strongest skill sets include:

- Driving company-wide design and research efforts with significant impacts on profitability and products
- Managing team and project performance by tracking progress, evaluating metrics, and measuring outcomes
- Collaborating cross-functionally with leadership, colleagues, and clients to adapt and innovate

EXPERIENCE

SmartAsset — June 2017 – June 2023

Associate Director of UX / UX Manager (Sep 2021 – June 2023)

- Oversaw UX strategy, operations, and team leadership, resulting in significant revenue growth. Key accomplishments include:
 - Enhancing UX efficiency by introducing a design system, design standards, and handoff guidelines
 - Utilizing user-centric research methods to inform product development and decision-making across the organization
 - Coordinating with cross-functional leadership to align design and research initiatives with company objectives
 - Managing daily UX operations, involving team KPI development, hiring, onboarding, and mentoring
- Spearheaded large-scale end-to-end research initiatives that improved the consumer experience and drove unprecedented growth
- Drove strategic efforts to optimize core consumer experience, directly increasing monthly revenue by \$1m+

Senior UX Researcher (Sep 2019 – Sept 2021)

- Promoted to lead all end-to-end research initiatives in order to identify unmet product and consumer opportunities
- Developed research strategy aligning product goals with user and market demands
- Fostered a user-centric culture by organizing internal workshops and facilitating knowledge sharing and product feedback
- Advanced data-driven decision making by implementing a comprehensive framework to track user sentiment and satisfaction

UX Researcher (June 2017 – Sept 2019)

- Founded the UX research function at Unicorn-trajectory startup
- Oversaw company-wide market trend and consumer research efforts
- Transformed qualitative and quantitative data into actionable insights, influencing design and product strategies
- Led research and redesign initiative for an interactive web tool, improving clicks per user by 54% and SERP position from 19th to 4th

University of Georgia — Aug 2014 – Jan 2016

Research Assistant

- Conducted statistical analysis to enhance research operations
- Implemented new technologies (SPSS and JMP) to streamline and improve analytical procedures

Georgia Institute of Technology — May 2013 – May 2014

Undergraduate Researcher

- Improved research operations through cloud migration, increasing efficiency and bolstering participant privacy
